

DR. RUNKLE F. HAGAMAN

August 17, 1926

Scoverville Physician and Surgeon.

TESTIFIED (pages 517 et seq.):

Performed both autopsies at request of Prosecutor Beekman through Detective Totten (517-18).

Heard part of Dr. Leahy's testimony as to Hall autopsy. His testimony would be repetition.

Generally speaking found a few small wounds on the hand and the rest a bullet wound (518-19).

Performed Mills autopsy. Found throat cut from right to left with a sharp instrument, which he would think would be a heavy instrument as he could not see an ordinary pen knife blade making such a cut, though a razor could (519).

Mrs. Mills shot three times. One bullet had passed through skull and two were found in skull cap (519).

Thought there was another bullet mark in curve of lip but probe did not pass in more than one-third of an inch (520).

Does not remember any marks showing a struggle (521).

Scratches on Dr. Hall's right arm. No marks on wrist (521).

Does not remember injury to Mrs. Mills right arm (521).

If bullet which struck Hall was directly fired at him he had his head lowered as he would in charging or in ducking, holding his head down (521-2).
